In claim 16, c, "in a oxidised surface layer" is ungrammatical.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16, c, "allowing bacterial oxidation to take place" is indefinite because no bacteria has been added prior to this step so that it is unclear how such bacterial oxidation can take place. Step b of this claim only recites providing conditions favorable for bacterial oxidation but does not require that the bacteria be present.

Claims 17-24 depend from cancelled claim 1 which renders these claims indefinite.

In claim 26, d, "allowing bacterial oxidation ... for a controlled period" is indefinite because no bacteria has been added prior to this step so that it is unclear how such bacterial oxidation can take place.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Livesey-Goldblatt.

Livesey-Goldblatt teaches the instantly claimed process wherein the pH is adjusted to 2-3 and the moisture content is 19-20% but differs in that the pH only overlaps that instantly claimed. See the abstract and pp. 91-94 and Fig. 1.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping

portion of the range disclosed by the reference because overlapping ranges have been held to be a prima facie case of obviousness, In re Malagari, 182 USPQ 549.

Claim 26 appears allowable over the cited prior art of record none of which teaches or suggests the instantly claimed combination of process steps.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
